FINANCIAL ANALYST

Driven analyst with strong background in data accuracy, operational coordination, inventory management, technical systems, and reporting. Brings analytical rigor from environmental data roles, research and development background, operational precision from logistics work, and advanced financial knowledge from graduate education. Experienced with large datasets, quality control, reporting, and cross-functional communication. Louisiana Army National Guard veteran with a Master of Science in Financial Planning, which has left me with a strong foundation in modeling, analysis, and organizational processes.
